

Kits Available (Includes Carrying Case)

Sizes .5" - 6" available

When using our dual designed clamping system, you will find a much easier and faster set-up for tacking your tube. Larger tubing is not always perfectly round; our dual tacking clamp will help better align and stabilize tubing for a better tack and weld.

Pictured: Tack Clamp open with allen wrench for precise alignment.

CLAMPS	PART NUMBER
.5"	P/N: STC-.5
.75"	P/N: STC-.75
1"	P/N: STC-1
1.5"	P/N: STC-1.5
2"	P/N: STC-2
2.5"	P/N: STC-2.5
3"	P/N: STC-3
4"	P/N: STC-4
6"	P/N: STC-6
Kit	P/N: STC 2-6 (2" to 6" Tube with case)
Kit	P/N: STC 1-4 (1" to 4" Tube with case)

FEATURES:

- Manufactured out of stainless steel to eliminate contamination while clamping down on tubing
- Dual side clamps for easier aligning of tubing in tack fixture
- Strong thumbscrew clamping design with allen wrench torquing ensures precise tube alignment
- Aligning mark to help center tubing in middle of clamping head
- Precision V angle to ensure simple aligning of the TIG torch cup
- Spacing to do 4 tacks without having to move tubing
